1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious all the limitations in the base claims 1, 7 and 11. Specifically, the combination of a semiconductor device comprising: the other wirings provided parallel to edges of the bonding pad are not formed in regions right under the edges, and wherein at least one of the other wirings of the second wiring layer that is insulated from the bonding pad is electrically connected to the first wiring layer by way of a via defined in an insulator located between the first and second wiring layers so that at least one of the other wirings of the second wiring layer is electrically connected to both of the first wiring layer, and the operation region by way of the first wiring layer; the insulating film comprises an inorganic insulating film only, so that a bottom surface of the bonding pad does not contact any organic insulating film; and wherein a group of the other wirings of the second wiring layer is not electrically connected to any wiring layer thereunder, whereas the one of the other wirings of the second wiring layer is electrically connected to the first wiring layer which is provided thereunder (claims 1 and 7); or the combination of a semiconductor device comprising: the other wirings are formed so as to avoid regions right under the edges in the lengthwise direction of the bonding pad to 3μ outside the regions, and wherein at least one of the other wirings of the second wiring layer that is insulated from the bonding pad is electrically connected to the first wiring layer by way of a via defined in

an insulator located between the first and second wiring layers so that at least one of the other wirings of the second wiring layer is electrically connected to both of the first wiring layer, and the operation region by way of the first wiring layer; the insulating film comprises an inorganic insulating film only, so that a bottom surface of the bonding pad does not contact any organic insulating film; and wherein a group of the other wirings of the second wiring layer is not electrically connected to any wiring layer thereunder, whereas the one of the other wirings of the second wiring layer is electrically connected to the first wiring layer which is provided thereunder (claim 11).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
